Digital Healthcare for Everyone

Company Summary

About

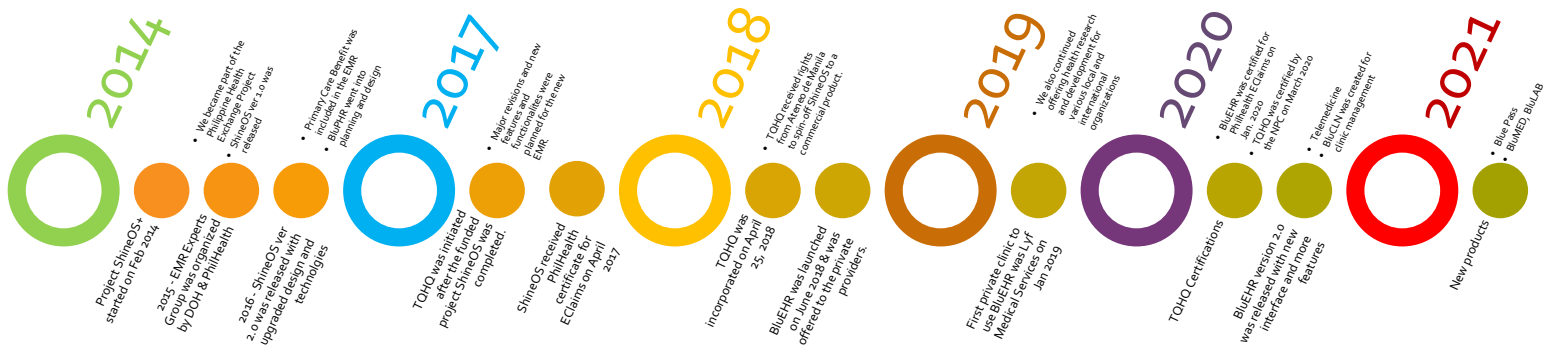

Tantum Quantum Headquarters Inc.

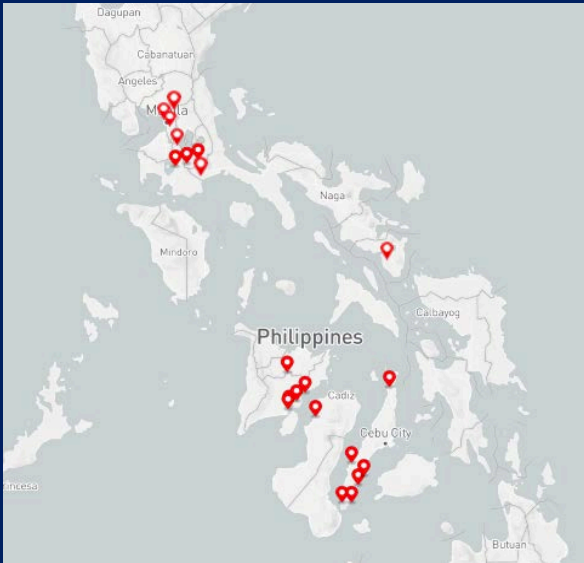

Digital health transformation that enhances continuity of care through advanced technology, products and services making doctor-patient experiences efficient, invaluable, and affordable.

Founded by the original developers of SHINEOS+, Tantum Quantum Headquarters developed an enterprise solution with a unified approach in addressing Universal Healthcare. Using the latest technology and health standards, the company is on a mission to provide efficient, invaluable and affordable digital and transformative health information solutions. Our 8 year experience in developing and providing cloud based solutions to various local healthcare providers gives us equal edge with international providers. We are the company that will ensure that you provide better health services, transforming healthcare and improving quality of life.

History

With its humble beginnings in 2014 as a funded project, we continue the mission of providing one of the best healthcare information systems in the Philippines.

Where are we at

We started small - steadily growing.

Our coverage is slowly taking ground and we will keep increasing our pace until we reach our goals.

70 Facilities **213** Users **491k+** Patients **420k+** Consults **10** Projects

The Team

We are a group of technology experts, researchers, design specialist, communications and social media expert banded together to create and provide transformative healthcare solutions that contribute to improving quality of life of every Filipino.

Romel John Santos

Our Products

A collective network of applications geared to enhance continuity of care for everyone.

Our cloud-based software-as-a-service is integrated into an ecosystem of shared health information system products & services making it a complete system not only for doctors but also for patients and all the other medical & healthcare services and providers.

Our **flagship application**, a cloud-based electronic health record application designed with and for clinicians who aim to utilize secured, efficient and digitized healthcare information technology solutions by transforming practice management.

Clinic Management System for a Universal Electronic Health Record

BluCLN is the clinic management application of our BluHealth Enterprise Network. It is integrated into our Electronic Medical Record **EMR** and health record system **EHR** to give clinic operations a complete digital transformation solution for their healthcare services.

Electronic Medical Record Application For Rural Health Units

Formerly known as **ShineOS+**, is our EMR built for government use - Rural Health Units, hence RHU. It was envisioned to be the first Healthcare Exchange System and was designed to provide provider facilities the ability to submit medical data to DOH and Philhealth. It was also geared to work with the Philippine Health Information Exchange - PHIE.

Upcoming Applications

BluPHR, the patient portal and web app

BluHIS, our hospital information system

We are pleased to announce our new application releases for the 4th quarter of 2022 and 1st quarter of 2023.

Our Services

Digital Health Transformation

Transforming how we do healthcare is our mission. By harnessing modern technologies, we can find better ways to healthcare.

Health Tech Research

Advancing healthcare through digital technologies.

We design systems for health research and development in various fields of medicine. We have the expertise and experience in building systems and applications to enhance and improve healthcare outcomes through various research programs.

We have collaborated with various researches in epidemics (dengue & typhoid), drug rehabilitation, heart failure, diabetes and physical rehab including amputation and cleft lip palate in children.

Health Analytics

Analyzing healthcare using big data.

We can develop dashboards to assist you in analyzing your health data for a more targeted and purposive approach in developing health care services for your patients.

Integration & Connectivity

Advancing healthcare through interoperability.

Through our health ecosystem, we can integrate your existing systems with ours to make your own healthcare services complete.

Medical User Experience Design

Enhancing healthcare by design.

We can help you with your health digital transformation by developing systems that are guided by your workflows.

Accreditations

As part of our commitment to provide an efficient and compliant healthcare information technology, we made sure we are recognized, validated, and certified by the different government and standards giving bodies. +
